SUMMARY

Databricks & Microsoft Certified Data Engineer & Data Analyst with over 9+ years of experience working with the Azure Data Engineering Stack, including Databricks, Data Factory, SQL DB, Power BI and Data Explorer. Adept in building scalable ETL pipelines using Python and PySpark with strong expertise in SQL and modern data warehousing practices. Solid understanding of Azure AdvanceExcel, M.S Access, SQL, Alteryx, Power BI, Tableau, Google Data Studio along with streaming architectures., currently leading migration of architecture from MySQL to Databricks using PySpark.

TECHNICAL SKILLS

Languages	Python, PySpark, SQL, VBA
ETL Tools	Azure Data Factory, Azure SQL DB, Databricks, M.S Fabric
BI/Visualization Tools	PowerBI, Tableau, Google Data Studio, AWS – QuickSight
Domain	Airline & Airport, Digital Marketing, Global Compensation (HR), Product Analysis, Finance, Aviation
Methodologies	Agile
Databases	MySQL, SQLite
Certification	Databricks Data Engineer, Microsoft Data Analyst, Azure Data Fundamentals

PROJECT SUMMARY

Organization: IGT Solutions	Job Title: Technical Architect
Domain: Aviation	Duration (Jun 23 – Present)
Tools & Technologies: Databricks, PySpark, Python SQL, Power BI, Description: Passenger Intelligence Journey Report Responsibilities: - • Evaluating business processes, anticipating requirements, uncovering areas for improvement, and developing and implementing solutions. • Leading architectural redesign and migration from MySQL to Databricks using PySpark and Azure. • Built many Power BI dashboards which streamlined manual reports and analysis, resulting in saving time and money. • Applied SQL and PySpark transformations to create reusable datasets for business intelligence reporting. • Used dynamic role-level security, to restrict users access to reports and dashboards at Region and Country Level based on their login credentials.	

Organization: Xebia	Job Title: Senior Consultant
Domain: Aviation	Duration (Mar 22 – June 23)
Tools & Technologies: SQL, Power BI, Azure Description: AAI – Integration Reporting Responsibilities: - - Evaluating business processes, anticipating requirements, uncovering areas for improvement, and developing and implementing solutions. - Built many Power BI dashboards which streamlined manual reports and analysis, resulting in saving time and money. - Used Power BI charts like Pie chart, Line chart, Bar chart, Trend chart, Slicer, Tables, and used Queries to handle multiple data-sets from API Management and MySQL database. - Programmed in DAX query language to modify data for visualization - Used dynamic role-level security, to restrict users access to reports and dashboards at Region and Country Level based on their login credentials.	

Organization: Coforge Ltd	Job Title: Sr. Data Analyst/Business Analyst
Domain: IT Services – Finance & Insurance	Duration (July 19 – March 22)
Tools & Technologies: Python, SQL, Power-BI Project Description: HSBC – Credit Card Responsibilities: - - Built multiple reports and dashboards related to credit card life cycle which included Issuer and Acquirer - Utilized Python for data preparation and transformation workflows. - Few data insights and use cases includes the following Card Application Pattern – Measures include card application acceptance and rejection pattern over time, geography, demography and channels System Performance – Analyzing Acquirer system performance in accepting or rejecting transactions and hence handling the overall transaction health and manage customer frustrations Spend Pattern – Analyzing users spend pattern like volume and amount per demographics, locations time etc. to identify up sell, cross sell and next best actions - Completed MBA program along with project works related to Machine Learning, Time Series Forecasting	

Organization: Omnicom Media Group	Job Title: Senior Associate
Domain: Designing/Reporting – Digital Marketing	Duration (Dec, 2017 – Jan, 2019)
Tools & Technologies: SQL, Alteryx, Tableau, Qlik Sense, Power BI, Excel Responsibilities: - Collaborating with global clients, responsible for end-to-end delivery of project which include data collection, data cleaning and processing, identifying KPI's for reporting & Visualization. - Collaborating with team to improve Quality process, help in automation using Alteryx, VBA and Qlik Sense, SQL. - Interacting with clients over phone and mails, understanding their requirements for reporting and Visualization	

Organization: Aon Hewitt	Job Title: Compensation Data Analyst
Domain: Designing/Reporting – Compensation	Duration (Mar, 2016 – Dec, 2017)
Tools & Technologies: SQL, Alteryx, Tableau, Power BI, Excel Responsibilities: • Being a part of Global Compensation Management team plays a key role in Survey Set up activity, data validation and processing on files received from various clients across the world using M.S Excel formulas, SQL functions and reporting the Market Statistics through internal tool. • Work with Research and Innovation team to develop and record various Macros using VBA and SQL in order to reduce manual human efforts.	

EDUCATION

MBA - Intelligence Data Science
NIIT University

2019-2021
